PROFESSIONAL SUMMARY

I am a 2nd-year B.Tech student in Electronics and Communication Engineering with strong interest in Machine Learning, Full Stack development, and problem-solving. Experienced in building real-world projects using web technologies, Python, embedded systems, and data-driven solutions.

EDUCATION

B.Tech (ECE), BIET Jhansi (2024–2028) — CGPA: 8.76

Senior Secondary: 93.6% | Secondary: 97%

TECHNICAL SKILLS

Languages: C, C++, Python

Web: HTML5, CSS3, JavaScript

Core: DSA, OOP

Machine Learning: NumPy, Pandas, Scikit-Learn, Matplotlib

Tools: GitHub, MySQL, Arduino, MS Office, Canva, Softtr, Multisim

PROJECTS

- **Portfolio Website:** Personal website showcasing projects and skills with responsive design.
- **Netflix Clone:** Responsive UI using HTML and CSS.
- **Telecom Churn Prediction:** Built ML model in Python to improve customer retention analysis.
- **House Rent Prediction:** Developed a first stage machine learning model to estimate rental prices based on property features.
- **Smart Voice Assistant using Python:** Developed a voice-controlled desktop assistant using Python.
- **Automatic Street Light:** Arduino-based system using LDR for energy-efficient lighting.

- **Air Quality Index Detector:** IoT system for real-time air quality monitoring.
- **Automatic Doorbell:** Sensor-based smart alert system.
- **Animality Website:** Designed and deployed using Softr.

INTERNSHIP EXPERIENCE

Python Programming Intern, Skills4India (YBI Foundation) — Developed mini applications and applied OOP concepts.

LEADERSHIP EXPERIENCE

Coordinator, Training and Placement Cell, BIET Jhansi — Assisted in organizing placement drives and coordinating with students and recruiters.

ACHIEVEMENTS & PARTICIPATION

- Participated in Code Clash Coding Competition.

WORKSHOPS

Aeroworks Workshop (BIET Jhansi),
AI Tools Workshop
